## PROJECTS

Here are some interesting projects I have worked on:

### BI Projects | API Integration | Python | Data Analytics

- Marvel Database Characters and Comics Data Story (2022)

URL: [Link here](#)

- A Survey Story of Data Chicks on Kaggle - Story of Female Kagglers. URL: [Link here](#)

### Deep Learning Project | PyTorch | CNN

- An Image Classifier built from scratch for the Identification of different species of flowers using Pytorch- AI Programming with Python (2021)

URL: [Link here](#)

### Python Project | Python

- Image Classification for a City Dog Show- Used a pre-trained image classifier to identify dog breeds with specific focus on the use of Python and not on the actual classifier. AI Programming with Python (2021) URL: [Link here](#)

### Machine Learning Project | Azure

- Predicting Mortgage Approvals from Government Data- Microsoft Professional Certification Capstone Project- (2019) URL: [Link here](#)

## SKILLS

PYTHON | PYTORCH | SQL | AWS

MS AZURE | POWER BI | FLASK DJANGO

| NEURAL NETWORKS | EXCEL | TENSORFLOW

DIGITAL MARKETING

## EDUCATION

### Udacity

Digital Marketing Nanodegree (2022)

AI Prog. with Python Nanodegree (2021)

[Link here](#)

### Microsoft

Microsoft Certified: Azure Data Scientist Associate [Link here](#) (2023)

Microsoft Professional Program in Data Science [Link here](#) (2019)

Completed courses on Python, SQL, Power BI, Ethics and Law in Data, Analytics Storytelling, etc.

### Federal University of Agriculture, Abeokuta, Ogun State-Nigeria.

M.Sc. Computer Science (2022)

Completed research work in Software engineering, Information Security and course work in Artificial Intelligence, Advanced Database Technology, etc.

B.Sc. Computer Science (2011)

Best Graduating Student with Honors.

## EXPERIENCE

### Freelance ML Engineer/ Data Scientist

Upwork | Freelancer.com | Arc (Aug. 2022 – Present)

Online freelancer working on various projects with clients and providing Artificial Intelligence, Machine Learning, and Data Science related services.

- Worked with clients from Eastern University USA, University of Bradford, etc.
- 100%+ Job Success Rate
- Met and exceeded client expectations of the final product or project.

### Lead, AI City Community

Data Scientist Network (Dec. 2019 – July, 2022)

- Coordinated ML projects, poster presentations, and model implementations.
- Worked on Loan Eligibility Projects, Data Analytics Projects, etc.
- Built a data science community in Benin city comprising university students, tech enthusiasts, recent graduates, and business professionals with 80% growth rate.
- Organized several python and machine learning training and workshops for university students in Benin and at Akure with over 500 participants.

### Data Scientist

Viisus Technology Limited, GRA, Benin City, Edo (May 2019 – Oct 2019)

- Designed enhanced data collection procedures to include information relevant for building analytic systems for clients.
- Designed an end-to-end machine learning engine which models students' academic performance in a standardized test using flask, python, and scikit-learn libraries.
- Worked with the dev., product, and business teams to design and launch a question bank prototype solution for clients in the education sector.

### Quality Assurance Analyst

Med-view Airlines (2014 – 2018)

- Developed models with excel for tracking flight time, analyzed audit compliance rate and generated conformance report that earned the airline its first and second [IOSA](#) certifications.
